Create safer & compliance-ready environment

Let's keep all safe

Vaccination Management

- 1 Create user profiles on the platform enabling them access to the cloud as well as the mobile app.
- 2 Set user profile based on High-risk or low-risk environment as well as vaccinated or unvaccinated to trigger the no. of test and period of validity.
- 3 Users declare/update the vaccination, and other test results, information, etc. via mobile app or cloud.
- 4 Once the information is approved manually or auto approved the user then has access to the facility booking.
- 5 Users will receive notification for periodically test results to be uploaded as defined in the system.

Capacity Management

- 1 Create facilities, set capacity limit, Set approval process & you are good to go.
- 2 Employees/Users/Members access mobile App or web to book the facility.
- 3 Booking is auto-approved or is sent to an approval process.
- 4 Employees/Users/Members get approval notification on mobile App.
- 5 Employees/Users/Member able to enter the facility.
