

Get both attendance and temperature readings of your visitor & staff without touching any surface in one fixed facial recognition system

Temperature Taking

ISO:27001 Certified

100% Cloud

Multi-Language

Face Recognition attendance

Real-time push to cloud

Multi-Location / Time zone

Instant Reports

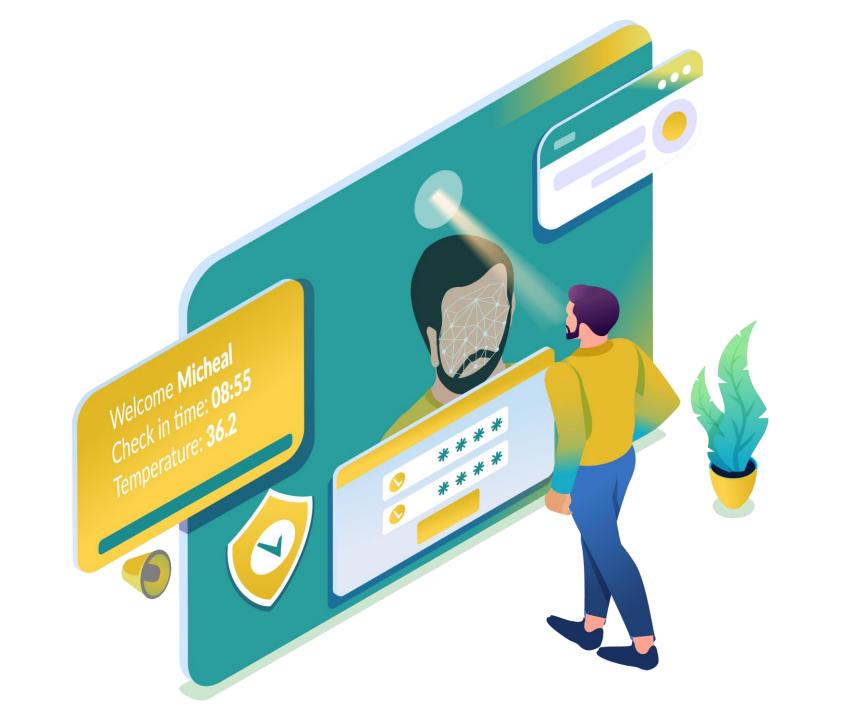

Completely Scalable

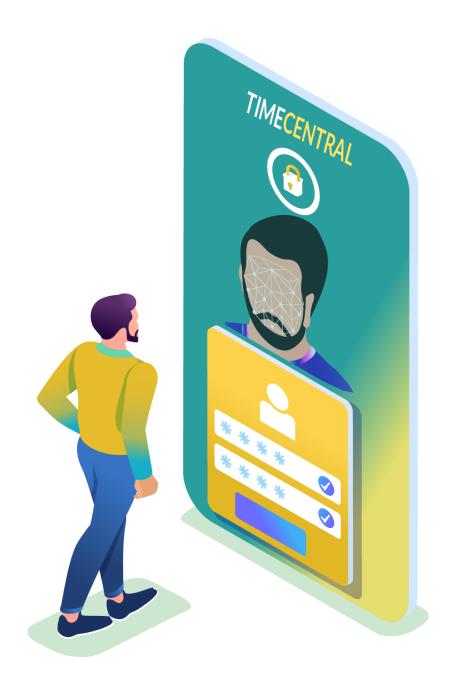

BIOTEMP

Biometric + Temperature

Contact-less authentication of attendance with temperature recording in safest and effective way

Face Recognition

Face Recognition

Facial recognition is the process of identifying or verifying the identity of a person using their face. It captures, analyses and compares patterns based on the person's facial textures and shapes.

8-Inch Dual Camera Face Recognition

Face Capacity: 20,000

1:N Face Recognition: 97.3%

Scanning Speed: 1 Second

1:1 Person Certificate Comparison: More than 99%

Temperature Alert & Alarm

Non-contact measurement of temperature readings of registered users i.e., staff/employees/workers and visitors as well throughout the day.

Modes: Celsius / Fahrenheit

Temperature Measurement range: **25C - 45C**

Thermal Image Field: 32x32

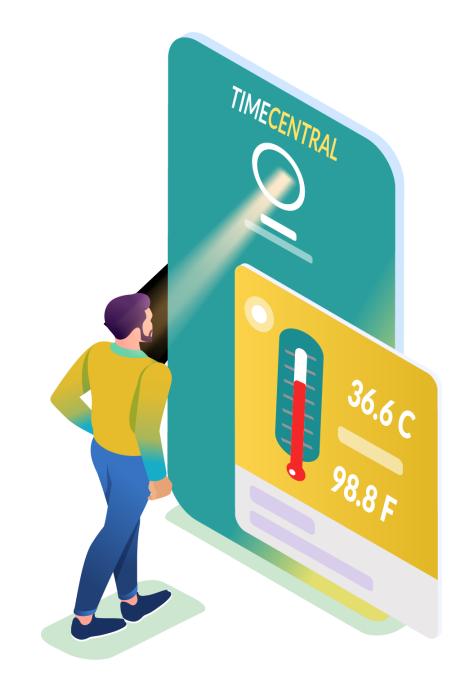

Body temperature alarm value can be set

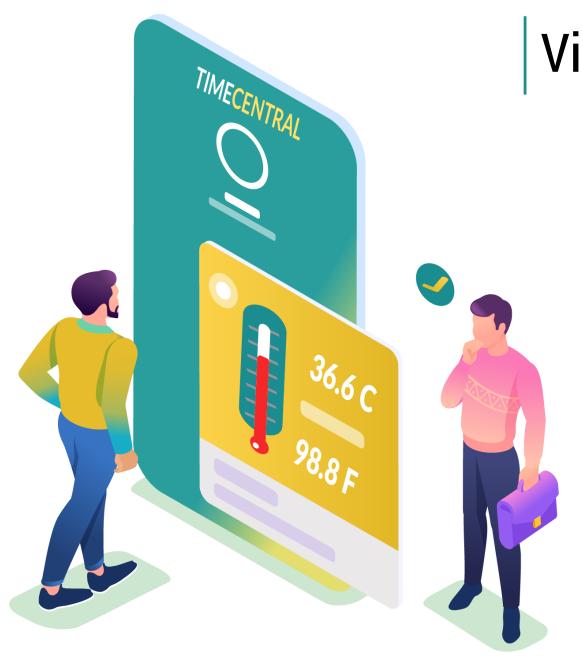

Enable disable access based on threshold

Alerts can be configured.

Store temperature records to the database.

Appropriate measures can be carried out to those higher than normal temperature

Visitor Temperature Recording

Due to the evolving COVID-19 situation, employers must put in place stringent measures to safeguard the health of their staff and visitor which includes temperature screening, health declaration, and ensuring safe distancing measures are observed at all times.

BIOTEMP has facilitated temperature taking by facial recognition sensors and recording of visitor details without physical contact. This will speed up the whole process faster and reduce physical contact.

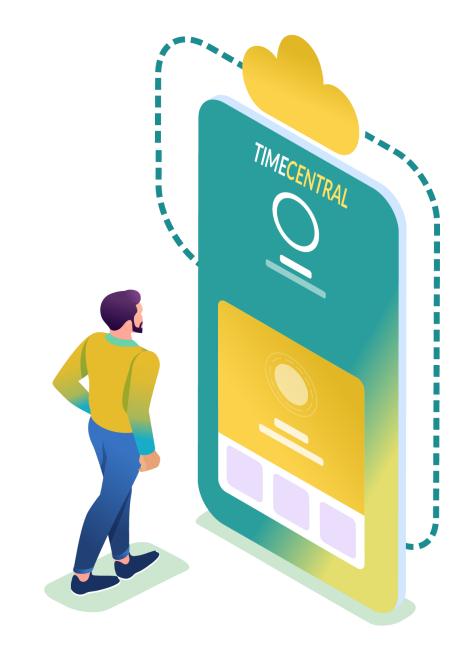

All offices who have adopted a temporary solution can now look forward to our automated solution that track visitors with their temperature readings on a daily basis.

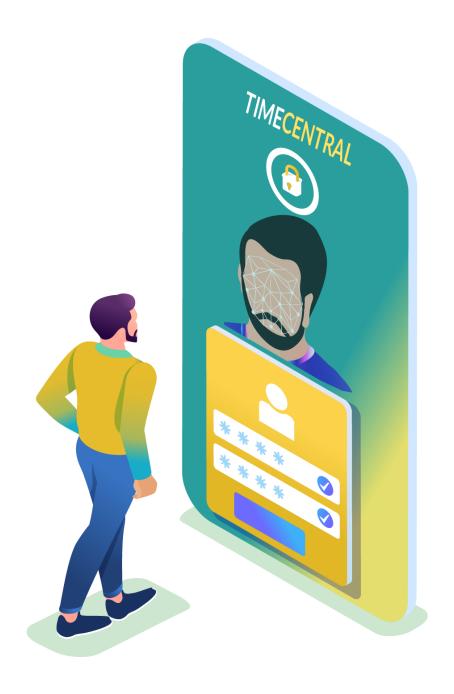

Realtime push to Cloud

Pushes data real-time to the cloud

Attendance, as well as temperature records, are transferred in real-time, making it easy for tracking and checking at the head office or operation center.

Prompting lateness and overtime reports in real time mode visible to managers by staff location or project.

Multi Time Zones

Works across the globe

Stay connected across the nation or the globe in one integrated system for all your offices, in multiple time zones.

TimeCentral platform unifies various devices to make sure stationed as well as mobile workforce is all covered.

Fixed Face biometric with temperature device + Mobile face recognition (Android & IOS device).

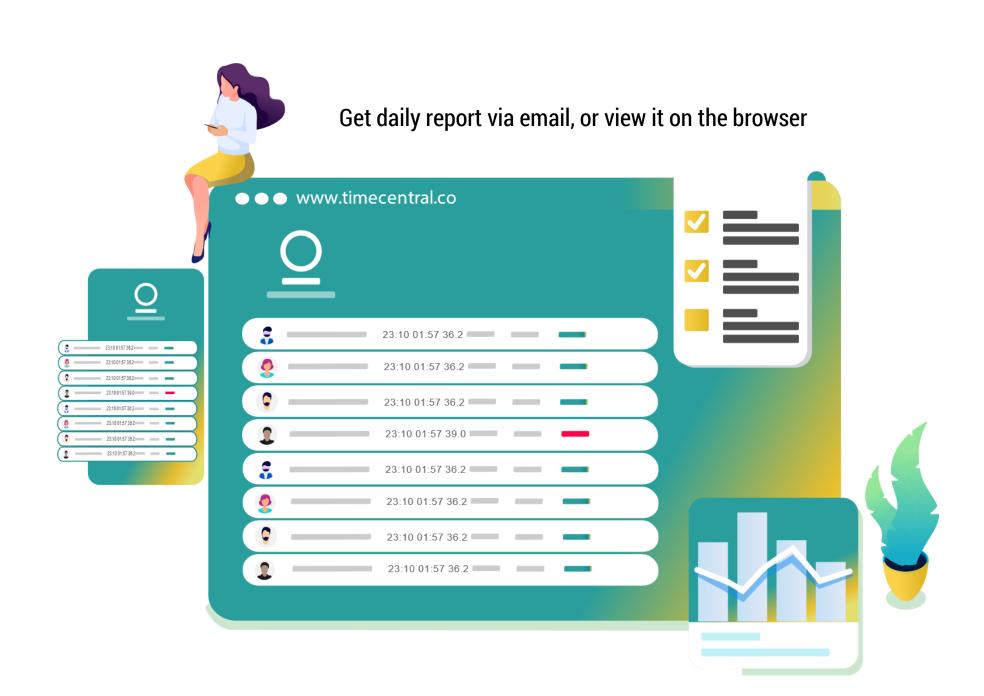

Blockchain Enabled

An Immutable Ledger

All records are stored on a private blockchain, making them immutable. There is no risk of data being manipulated nor accessible by third parties. This allows our customers to prove their records are true, using the laws of mathematics.

An added layer of security is provided by the use of a Trust Anchoring meta chain, which hashes your data in a widely shared public blockchain..
