

Overview

Country or Region: Singapore
Industry: Education

Customer Profile

Achievers dream is the leading chemistry tuition centre in Singapore that specialises in teaching O level chemistry tuition, A level chemistry tuition & IGCSE chemistry tuition... It provides O, A & h2 Chemistry tuition, junior college Chemistry tuition."

Business Situation

The Safe Management Measures for COVID-19 that is mandatory for all workplaces / offices and businesses, we needed a fast and effective solution that could help us with Crowd Control & Temperature-taking.

This is especially so for our Company as we are in education services and we would expect high human traffic on the days of our operation when we have back to back classes.

Solution

BIOTEMP SafeEntry solution was implemented for contactless temperature screening of office employees, site workers and visitors.

The device provided contactless and precise measurement of personnel's forehead temperature in less than 1 second. By automatically synchronizing the temperature with time and attendance system meant lesser paperwork and effort.

The HR team was able to configure notifications and alerts for personnel with temperature beyond any pre-set threshold.

"I bought TimeCentral Bio Temperature taking machine to take temperature more efficiently in Achievers Dream. After sharing with them my request, I'm extremely impressed with the kind of service provided from the start to the end.

I'm satisfied with the features provided. Not only the machine is fast and accurate, it is also convenient for our staff! It saved a lot of time and also the process in the centre are much streamlined and professional!"

Jerald Lie, Director, Achievers Dream
